Cluster based qns

I. Java theory qns

1. Differences between JDK, JRE, and JVM
2. Concept of OOPS (Object-Oriented Programming) with examples
3. Difference between method overloading and method overriding
4. Access modifiers in Java
5. Concept of inheritance with an example
6. Difference between an abstract class and an interface
7. Difference between == and .equals() in Java
8. Constructor and types of constructors in Java
9. Difference between final, finally, and finalize()
10. Concept of exception handling in Java
11. Difference between checked and unchecked exceptions
12. Multithreading and its implementation in Java
13. Difference between ArrayList and LinkedList
14. Difference between HashMap and Hashtable
15. Wrapper classes in Java
16. Garbage collection in Java
17. Lambda expressions in Java
18. JUnit and its usage
19. Achieving encapsulation in Java
20. Static methods and variables
21. Which Java version do you use, and what are its key features
22. How does HashMap handle null values and duplicate values
23. What are the pillars of OOPS
24. What is Inheritance
25. Difference between function overloading and function overriding
26. What is Polymorphism
27. What is the difference between an abstract class and an interface
28. What is the this and super keyword in Java
29. Can you explain the differences between JVM (Java Virtual Machine) and JRE (Java Runtime Environment)
30. Why do you think JAVA is safe compared to other languages
31. What is encapsulation
32. ArrayList vs HashMap
33. Final keyword in Java
34. Use of final keyword

- 35. Exception handling in Java
- 36. Shallow copy vs deep copy
- 37. Difference between Python and Java
- 38. Java and its features
- 39. Explain OOPS concepts

Coding qns practice for java cluster

- ☐ Find whether a given string is a palindrome or not.
- ☐
- ☐ Remove duplicates in an array.
- ☐
- ☐ Find the largest element in an array.
- ☐
- ☐ Reverse a string.
- ☐
- ☐ Find duplicate elements in an array.
- ☐
- ☐ Check if a string is a palindrome.
- ☐
- ☐ Find the smallest element in an array.
- ☐
- ☐ Implement a stack or queue.
- ☐
- ☐ Check if a number is prime.
- ☐
- ☐ Generate the Fibonacci series.
- ☐
- ☐ Calculate the factorial of a number.
- ☐
- ☐ Implement a binary search algorithm.
- ☐
- ☐ Reverse an array.
- ☐
- ☐ Find the missing number in an array.
- ☐
- ☐ Find the longest substring without repeating characters.
- ☐
- ☐ Write a code for bubble sort.

- ☐
- ☐ Write a Java program to print the first 50 prime numbers.
- ☐
- ☐ Java program to print vowels of your name and count those vowels.
- ☐
- ☐ Replace the vowels in a name with numeric values, print the new name, and also print the count of replaced values.
- ☐
- ☐ Write code to print the first 10 numbers.
- ☐
- ☐ Write code for prime numbers in Java.
- ☐
- ☐ Print the largest palindrome in a given string. Sample input:"banana"
Expected output:"anana"
- ☐

.

II. SQL questions

- 1.Difference between SQL and MySQL
- 2.Different types of SQL commands (DDL, DML, DCL, TCL)
- 3.Primary key and foreign key with example
- 4.Difference between WHERE and HAVING clause
- 5.JOIN and types of JOINS in SQL
- 6.Difference between INNER JOIN and OUTER JOIN
- 7.Normalization and its types
- 8.Denormalization
- 9.Index and types of indexes in SQL
- 10.Difference between clustered and non-clustered index
- 11.Views in SQL
- 12.Difference between DELETE, TRUNCATE, and DROP
- 13.Query to find duplicate records in a table
- 14.Difference between UNION and UNION ALL

- 
15. Stored procedures in SQL
 16. Triggers in SQL
 17. Aggregate functions in SQL
 18. Subquery and types of subqueries
 19. Difference between CHAR and VARCHAR
 20. Write an SQL query to find the third highest salary from the employee table
 21. Find the maximum salary from a table
 22. Given a table, write SQL queries to add, delete, and modify data
 23. What are aggregate functions in SQL
 24. What is the difference between an inner join and an outer join
 25. SQL queries on joins with three tables
 26. Types of joins
 27. Explain normalization forms
 28. What are the advantages of a DBMS
 29. When does a checkpoint occur in DBMS
 30. What is TCL
 31. Unique key and primary key
 32. Create a table in SQL
 33. Drop vs Truncate
 34. Views in SQL
 35. Self join in SQL
 36. SQL code for creating views for two tables
 37. SQL table creation and database creation syntax
 38. Use of Database in a Real-Time Scenario
 39. View in SQL and its Real-Time Usage
 40. Write an SQL query to find the second-highest salary
 41. Union and Union All

Python cluster

Theory qns

1. Difference between Python and Java.
2. What are generators?
3. What is the usage of the with statement?
4. Explain exception handling in Python.
5. What are the key features of Python
6. What is the difference between list and tuple
7. What are *args and **kwargs
8. Explain the difference between is and ==
9. What is a lambda function
10. What are the different data types in Python
11. What is a dictionary in Python
12. What is the difference between append(), extend(), and insert() in lists
13. What are Python's built-in data structures
14. What is list comprehension
15. What is the difference between break, continue, and pass
16. What is the difference between local and global variables
17. What are Python modules and packages
18. What is the purpose of the init method
19. What is inheritance in Python
20. What is the difference between deep copy and shallow copy
21. What is exception handling in Python
22. What is the use of with statement in file handling
23. What is recursion, give an example
24. What is the difference between sort() and sorted()
25. What are Python's advantages and disadvantages
26. What are Python identifiers and rules for naming them
27. What are Python keywords
28. What is the difference between mutable and immutable objects in Python
29. What is type casting in Python with examples
30. What is the difference between Python 2 and Python 3
31. What is indentation in Python and why is it important
32. What is the use of the id() function in Python
33. What are Python comments and how to write single-line and multi-line comments
34. What is slicing in Python with examples
35. What is the difference between del, remove(), and pop() in Python lists
36. What are Python strings and some common string functions

37. What is the difference between `isdigit()`, `isnumeric()`, and `isdecimal()`

(Refer the SQL qns give above for the python cluster)

Coding qns

1. Write a program to print the first 50 prime numbers.
2. Write a program to print the vowels of your name and count those vowels.
3. Replace the vowels in a name with numeric values, print the new name, and also print the count of replaced values.
4. Write a try and except program to demonstrate exception handling.
5. Implement any sorting algorithm (e.g., Bubble Sort).
6. Sort an array.
7. Write a program for the Fibonacci series.
8. Write a code for bubble sort.
9. Print the largest palindrome in a given string (e.g., input "banana", output "anana").
10. Find whether a given string is a palindrome or not.
11. Remove duplicates in an array.
12. Find the largest element in an array.
13. Reverse a string.
14. Find duplicate elements in an array.
15. Check if a string is a palindrome.
16. Find the smallest element in an array.
17. Implement a stack or queue.
18. Check if a number is prime.
19. Generate the Fibonacci series.
20. Calculate the factorial of a number.
21. Implement a binary search algorithm.
22. Reverse an array.
23. Find the missing number in an array.
24. Find the longest substring without repeating characters.
25. Write a code for bubble sort.

C sharp cluster

1. What are the main features of C#
2. What is the difference between ref and out keywords
3. What is the difference between == and .Equals() in C#
4. What is the difference between value types and reference types
5. What are access modifiers in C#
6. What is a constructor
7. What is a static constructor
8. What is the difference between abstract class and interface
9. What is the use of sealed class in C#
10. What is method overloading and overriding
11. What is inheritance in C#
12. What is encapsulation
13. What is polymorphism
14. What are properties in C#
15. What is the difference between const, readonly, and static
16. What is a delegate in C#
17. What is the difference between delegate and event
18. What is exception handling in C#
19. What are try, catch, finally, and throw used for
20. What is boxing and unboxing in C#
21. What is the difference between Array and ArrayList
22. What is the purpose of the using statement in C#
23. What are nullable types and how are they declared
24. Explain the concept of async and await in C#
25. What are extension methods and how are they created
26. What is a lambda expression in C#
27. What is the difference between String and StringBuilder
28. What are attributes in C# and how are they used
29. What is the difference between IQueryable and IEnumerable
30. What is dependency injection and how is it implemented in C#
31. What are generics and what benefits do they provide

(Refer sql qns that give before)

Coding qns c sharp

1. Write a program to check if a number is prime
2. Write a program to reverse a string
3. Write a program to find the factorial of a number
4. Write a program to generate the Fibonacci series
5. Write a program to check if a string is a palindrome
6. Write a program to remove duplicates from an array
7. Write a program to find the largest element in an array
8. Write a program to sort an array using bubble sort
9. Write a program to implement a stack using classes
10. Write a program to count the number of vowels in a string
11. Write a program to find the sum of digits of a number
12. Write a program to demonstrate method overloading
13. Write a program to demonstrate exception handling with try-catch
14. Write a program to read from and write to a text file
15. Write a program to find the second largest number in an array
16. Write a program to perform linear search on an array
17. Write a program to demonstrate the use of delegates
18. Write a program to multiply two matrices
19. Write a program to convert a string to uppercase without using built-in methods
20. Write a program to check if two strings are anagrams

♦ HTML Questions

1. What is HTML
2. What are semantic tags in HTML
3. Difference between <div> and

4. What is the purpose of <!DOCTYPE html>
5. Difference between id and class attributes
6. What are the different types of input in HTML5
7. What is the use of the <meta> tag
8. What is the difference between <script> and <noscript>
9. What is the purpose of the <form> tag
10. What is the difference between block-level and inline elements

♦ CSS Questions

What is CSS

1. What are the different types of CSS
2. Difference between relative, absolute, fixed, and sticky positioning
3. What is the difference between id and class in CSS selectors
4. What is the box model in CSS
5. What is the difference between em, rem, %, and px
6. How to apply styles to multiple elements
7. What is the difference between visibility: hidden and display: none
8. What are pseudo-classes in CSS
9. How do media queries work in responsive design

♦ JavaScript Questions

1. What is JavaScript
2. Difference between var, let, and const
3. What is a closure in JavaScript
4. What is the difference between == and ===
5. What are arrow functions in JavaScript
6. What is event bubbling and event capturing
7. What is the difference between null and undefined
8. What are synchronous and asynchronous operations
9. What is the use of setTimeout() and setInterval()
10. What is the DOM in JavaScript

If you find helpful do subscribe our channel

https://youtube.com/@coder_girl_11?si=3Ekju11APmy8jOFk

Thanks you all the best

Do well !!

In the pdf you get qns next pdf you get interview experience of all the ppls from April 2025 to june 2025 interview qns

https://topmate.io/coder_girl_11
